Subject index of volume 346

A

acetylcholine release, cholinergic neurons, muscarinic receptors; hypothalamus, rats 1
acetylcholine release, cholinesterase, muscarinic receptor subtypes; chicken heart 375
acetylcholine release, purinoceptors, neurotransmission, adenosine analogues; hemidiaphragma 197
acetylsalicylic acid, photochemical reaction, thrombosis, arrhythmia; coronary artery, rats, 550
aconitase, alloxan, glucose, 3-O-methylglucose; liver mitochondria, rats, 532
action potential, beta-adrenoceptors, contraction force; human heart mucle 82
adenine nucleotides, glutamat, adrenaline release, adenosine receptors; brain cortex, rabbit, 677
adenosine analogues, acetylcholine release, purinoceptors, neurotransmission; hemidiaphragma, mice 197
adenosine analogues, CGS 21680, platelet aggregation, adenosine receptors; human and rabbit platelets, 673
adenosine binding protein, adenosine receptors; bovine striatum 63
adenosine receptors, adenine nucleotides, glutamat, adrenaline release; brain cortex, rabbit, 677
adenosine receptors, adenosine analogues, CGS 21680, platelet aggregation; human and rabbit platelets, 673
adenosine receptors, adenosine binding protein; bovine striatum 63
adenosine receptors, ischemia, reperfusion, leukocyte-endothelium interaction; skinfold chamber, syrian golden hamster 234
adenylyl cyclase, serotonin 1A receptors; monoclonal cell lines 367
adrenaline release, adenosine receptors, adenine nucleotides, glutamat; brain cortex, rabbit, 677
adrenergic neurotransmission, calcium channels; canine saphenous vein 419

adrenoceptors, inotropic effect, catecholamines; heart, rabbit, 665
age dependency, pentylenetetrazol, anticonvulsant activity; epileptic seizures, rats, 588
age-related changes, neuronal noradrenaline uptake; vas deferens, rats 405
aging, chloride channels, postnatal development; skeletal muscles, 601
alloxan, glucose, 3-O-methylglucose, aconitase; liver mitochondria, rats, 532
alpha 1-adrenoceptors, calcium concentration; atrial myocytes, rats 88
alpha-adrenoceptors, co-transmission, ATP, noradrenaline; tail artery, rats 173
aluminum fluoride, phospholipase D, protein kinase C, phorbol ester; atria, rats, 607
amino acids, excitatory, dopamine, GABA; substantia nigra, microdialysis, rats, 637
analgesia, eicosanoids, magnolol, anti-inflammatory effect; mice, paw, 707
angiotensin-converting enzyme inhibitors, prostaglandin metabolism; healty volunteers 453
anipamil, verapamil, gallopamil, calcium channel blocking; heart, rabbit 339
antiarrhythmic drugs, asocainol, enantioselectivity, Na channel blocking; guinea pig atria 345
anticonvulsant activity, age dependency, pentylenetetrazol; epileptic seizures, rats, 588
anticonvulsants, sodium current, ralitoline; seizure models, rodents 442
antihypertensive compounds, salidiuretic action, cicletanine, ion transport; human red blood cells 114
anti-inflammatory effect, analgesia, eicosanoids, magnolol; mice, paw, 707
antinociception, clonidine, 5-HT pathways; medulla oblongata, spinal cord, rats 333
apamin, potassium channels, PACAP receptors, vasoactive intestinal polypeptide; taenia caeci, guinea pig, 511
arrhythmia, acetylsalicylic acid, photochemical reaction, thrombosis; coronary artery, rats, 550
arrhythmia, infarction, lidocaine; electrical stimulation, dog 213
asocainol, enantioselectivity, Na channel blocking, antiarrhythmic drugs; guinea pig atria 345
ATP, noradrenaline, alpha-adrenoceptors, co-transmission; tail artery, rats 173
benzodiazepine receptors, Ro 5-4864, PK 11 195, GABA receptors; chronic treatment, rats 432

B

beta 2-adrenoceptors, vasodilation, microcirculation, celiprolol; mesenterium coli, guinea pig 27
beta-adrenoceptors, contraction force, action potential; human heart mucle 82
beta-adrenoceptors, isoprenaline, pindolol, mepindolol, bopindolol; atria, rats, 657
bicarbonate-dependent transporter, pH; cardiomyocytes, rats, 597
biliary motility, sphincter Oddi, erythromycin; australian possum, 701
biotransformation, Parkinsonism, L-DOPA; substantia nigra, rats 277
blood pressure, bronchoconstriction, CP-96,345, tachykinin antagonist, substance P; rabbit, guinea pig 323
blood pressure, calcium intake, Na:K ratio; hypertensive rats, 542
blood pressure, pain, nociception, bradykinin, capsaicin; rats 219
BM 06.021, plasminogen activator, thrombolytic potency; rabbit, dog 108
bopindolol, beta-adrenoceptors, isoprenaline, pindolol, mepindolol; atria, rats, 657
bradykinin, capsaicin, blood pressure, pain, nociception; rats 219
bradykinin antagonists, relaxation, potassium channels, bradykinin receptors; duodenal smooth muscle, rats 102
bradykinin B_2 receptors, cAMP, calcium; human astrocytoma cells 303
bradykinin receptors, bradykinin antagonists, relaxation, potassium channels; duodenal smooth muscle, rats 102
bronchoconstriction, CP-96,345, tachykinin antagonist, substance P, blood pressure; rabbit, guinea pig 323

C

calcitonin gene-related peptide, calcium channel current, cell membranes; vas deferens, rats, 515
calcium, bradykinin B_2 receptors, cAMP; human astrocytoma cells 303
calcium, endothelin; human astrocytoma cells 51
calcium, protein kinase C, veratridine, diacylglycerol; bovine adrenal medullary cells 76
calcium antagonism, felodipine, xanthine, oxygen free radicals; ischemia, rats 457
calcium antagonists, soman, muscarinic receptors; bronchial smooth muscle, rats 352
calcium channel blocking, anipamil, verapamil, gallopamil; heart, rabbit 339
calcium channel current, cell membranes, calcitonin gene-related peptide; vas deferens, rats, 515
calcium channels, adrenergic neurotransmission; canine saphenous vein 419
calcium channels, PN 200-110, insuline release; rat insulinoma cells, 527
calcium concentration, alpha 1-adrenoceptors; atrial myocytes, rats 88
calcium intake, Na:K ratio, blood pressure; hypertensive rats, 542
calcium release, phosphatidylinositol turnover, muscarinic receptors; human neuroblastoma cells 255
cAMP, calcium, bradykinin B_2 receptors; human astrocytoma cells 303
cAMP, forskolin, noradrenaline release, clenbuterol; atria, rats 311
capsaicin, blood pressure, pain, nociception, bradykinin; rats 219
capsaicin, gastric acid secretion; stomach, rats, 685
cardiac contractility, 5-HT; porcine atrium, 486
cardiotonic effect, R 79595, phosphodiesterase III inhibition, heart failure; heart-lung preparation, guinea pig, 563
cardiovascular effects, substance P antagonist, CP-96,345; blood pressure, heart rate, rats 328
catecholamine accumulation, pertussis toxin; bovine adrenal medulla, 649
catecholamine-potentiating effect, hypertension; human veins, 490
catecholamines, adrenoceptors, inotropic effect; heart, rabbit, 665
catecholamines, monoamine oxidase, catechol-O-methyltransferase; perfused rat lung 20
celiprolol, beta 2-adrenoceptors, vasodilation, microcirculation; mesenterium coli, guinea pig 27
cell membranes, calcitonin gene-related peptide, calcium channel current; vas deferens, rats, 515
cervane alkaloids, imperialine, muscarinic receptor subtypes; guinea pig, dog 144
cGMP, KRN 2391, potassium channel openers, vasorelaxation; isolated rabbit aorta 94
CGS 21680, platelet aggregation, adenosine receptors, adenosine analogues; human and rabbit platelets, 673
chloride channels, postnatal development, aging; skeletal muscles, 601
cholecystokinin receptors, novelty-oriented behaviour; brain, rats 425
cholinergic neurons, muscarinic receptors, acetylcholine release; hypothalamus, rats 1
cholinesterase, muscarinic receptor subtypes, acetylcholine release; chicken heart 375
cicletanine, ion transport, antihypertensive compounds, salidiuretic action; human red blood cells 114
clenbuterol, cAMP, forskolin, noradrenaline release; atria, rats 311
clonidine, 5-HT pathways, antinociception; medulla oblongata, spinal cord, rats 333
complement 5a receptor, G-protein, receptor-receptor interaction, formyl-peptide receptor; human leukemia 60 cells, 475
COMT inhibitors, L-DOPA, Parkinsonism, entacapone; rats ,262
contraction force, action potential, beta-adrenoceptors; human heart mucle 82
contraction force, 5-HT receptors, heart failure; human heart, 482
corticosterone, 5-HT receptors; rats, 121
co-transmission, ATP, noradrenaline, alpha-adrenoceptors; tail artery, rats 173
CP-96,345, cardiovascular effects, substance P antagonist; blood pressure, heart rate, rats 328
CP-96,345, substance P antagonist, tachykinins; ileum, guinea pig, jejunum, rabbit 315

CP-96,345, tachykinin antagonist, substance P, blood pressure, bronchoconstriction; rabbit, guinea pig 323
cromakalim, K-channel; human airway smooth muscle 462

D

deamination, noradrenaline metabolism; human uterine artery 286
desipramine, membrane solubilisation, noradrenaline transport system; bovine adrenal medulla 203
diacylglycerol, calcium, protein kinase C, veratridine; bovine adrenal medullary cells 76
digitoxin, metabolism, UDP-glucuronosyl-transferase, sulfotransferase; human liver 226
dizocilpine, 5-HT receptors, NMDA receptors; rats 138
dopamine, GABA, amino acids, excitatory; substantia nigra, microdialysis, rats, 637
dopamine D receptors, intraocular pressure; ciliary body, rabbit, 644
dopamine D2 receptors, prolactin; rats 152
dopamine metabolism, taurin, homotaurin, GABA; hypothalamus, striatum, rats 57
dopamine neurons, limbic system, physostigmine; brain, rats 395
dopamine release, regional differences; caudat putamen, rats 267
dopamine release, serotoninergic drugs; substantia nigra, striatum, limbic forebrain, rats 12
dopamine system, metabolism, thermoregulation; substantia nigra, rats, 504
dopamine urinary excretion, kidney function; treatment regimens, rats 469

E

eicosanoids, magnolol, anti-inflammatory effect, analgesia; mice, paw, 707
enantioselectivity, Na channel blocking, antiarrhythmic drugs, asocainol; guinea pig atria 345
endothelin, calcium; human astrocytoma cells 51
endothelium, prazosin; aorta, rats 294
energy requirements, neuropeptide Y, potassium, sodium, noradrenaline release; perfused heart, guinea pig 410
entacapone, COMT inhibitors, L-DOPA, Parkinsonism; rats, 262
epileptiform activity, magnesium; entorinal cortex-hippocampus slices, rats, 581
erythromycin, biliary motility, sphincter Oddi; australian possum, 701
ethanol, excitatory amino acid receptors, withdrawal; ethanol-treatment, rats 437
ethylcholine aziridium, glutamate, GABA, memory, triiodo-L-thyronine; mice 238
excitatory, dopamine, GABA, amino acids; substantia nigra, microdialysis, rats, 637
excitatory amino acid receptors, withdrawal, ethanol; ethanol-treatment, rats 437
extraneuronal transport for noradrenaline; Caki-1 cells 158

F

felodipine, xanthine, oxygen free radicals, calcium antagonism; ischemia, rats 457
formyl-peptide receptor, complement 5a receptor, G-protein, receptor-receptor interaction; human leukemia 60 cells, 475
forskolin, noradrenaline release, clenbuterol, cAMP; atria, rats 311

G

GABA, amino acids, excitatory, dopamine; substantia nigra, microdialysis, rats, 637
GABA, dopamine metabolism, taurin, homotaurin; hypothalamus, striatum, rats 57
GABA, memory, triiodo-L-thyronine, ethylcholine aziridium, glutamate; mice 238
GABA receptor complex, prolactin, steroids; pituitary cell cultures, 523
GABA receptors, benzodiazepine receptors, Ro 5-4864, PK 11 195; chronic treatment, rats 432
gallopamil, calcium channel blocking, anipamil, verapamil; heart, rabbit 339
gastric acid secretion, capsaicin; stomach, rats, 685
glucose, 3-O-methylglucose, aconitase, alloxan; liver mitochondria, rats, 532
glutamat, adrenaline release, adenosine receptors, adenine nucleotides; brain cortex, rabbit, 677
glutamate, GABA, memory, triiodo-L-thyronine, ethylcholine aziridium; mice 238
G-protein, haloperidol, sigma-receptors, noradrenaline release; hippocampus, rats 32
G-protein, receptor-receptor interaction, formyl-peptide receptor, complement 5a receptor; human leukemia 60 cells, 475
G-protein, serotonin receptors, transfection; CHO-cells 127
guanylyl cyclase, sequence directed antibodies, immunoprecipitation; bovine, human platelets, 537

H

haloperidol, sigma-receptors, noradrenaline release, G-protein; hippocampus, rats 32
heart failure, cardiotonic effect, R 79595, phosphodiesterase III inhibition; heart-lung preparation, guinea pig, 563
heart failure, contraction force, 5-HT receptors; human heart, 482
histamine, L-histidine, histaminergic neuron system; electrically-induced seizures, mice 40
histamine 3 receptors, neuroeffector junction; nictitating membrane, cat 208
histamine H_3 receptors, noradrenaline release; human saphenous vein 46
histaminergic neuron system, histamine, L-histidine; electrically-induced seizures, mice 40
homotaurin, GABA, dopamine metabolism, taurin; hypothalamus, striatum, rats 57
5-HT, cardiac contractility; porcine atrium, 486
5-HT like receptors, sumatriptan; coronary arteries, dog, 592
5-HT pathways, antinociception, clonidine; medulla oblongata, spinal cord, rats 333
5-HT receptor subtypes; brain, rabbit 249
5-HT receptors, corticosterone; rats, 121
5-HT receptors, heart failure, contraction force; human heart, 482
5-HT receptors, inotropic effect; porcine atrial force, 629
5-HT receptors, ligand selectivity; 4
5-HT receptors, NMDA receptors, dizocilpine; rats 138
5-HT receptors, ondansetron, tropisetron; vagus nerve, rats, 496
5-HT receptors; radioligand binding, human animal brain 243
hyperpolarization, uptake 2, isoprenaline; trachealis muscle, guinea pig 399
hypertension, catecholamine-potentiating effect; human veins, 490

I

immunoprecipitation, guanylyl cyclase, sequence directed antibodies; bovine, human platelets, 537
imperialine, muscarinic receptor subtypes, cervane alkaloids; guinea pig, dog 144
infarction, lidocaine, arrhythmia; electrical stimulation, dog 213
inotropic effect, catecholamines, adrenoceptors; heart, rabbit, 665
inotropic effect, 5-HT receptors; porcine atrial force, 629
insuline release, calcium channels, PN 200-110; rat insulinoma cells, 527
intraocular pressure, dopamine D receptors; ciliary body, rabbit, 644
ion transport, antihypertensive compounds, salidiuretic action, cicletanine; human red blood cells 114
ischemia, reperfusion, leukocyte-endothelium interaction, adenosine receptors; skinfold chamber, syrian golden hamster 234
isoprenaline, hyperpolarization, uptake 2; trachealis muscle, guinea pig 399
isoprenaline, pindolol, mepindolol, bopindolol, beta-adrenoceptors; atria, rats, 657

K

K channel openers, thromboxane A analogues, Ki4032; coronary arteries, dog, 691
K-channel, cromakalim; human airway smooth muscle 462
Ki4032, K channel openers, thromboxane A analogues; coronary arteries, dog, 691
kidney function, dopamine urinary excretion; treatment regimens, rats 469
KRN 2391, potassium channel openers, vasorelaxation, cGMP; isolated rabbit aorta 94

L

L-DOPA, biotransformation, Parkinsonism; substantia nigra, rats 277
L-DOPA, Parkinsonism, entcapone, COMT inhibitors; rats, 262
leukocyte-endothelium interaction, adenosine receptors, ischemia, reperfusion; skinfold chamber, syrian golden hamster 234
L-histidine; histaminergic neuron system, histamine, electrically-induced seizures, mice 40
lidocaine, arrhythmia, infarction; electrical stimulation, dog 213
ligand selectivity, 5-HT receptors; 4
limbic system, physostigmine, dopamine neurons; brain, rats 395

M

magnesium, epileptiform activity; entorinal cortex-hippocampus slices, rats, 581
magnolol, anti-inflammatory effect, analgesia, eicosanoids; mice, paw, 707
melatonin, UK-14304, thermoregulation; caudal artery, rats 362
membrane solubilisation, noradrenaline transport system, desipramine; bovine adrenal medulla 203
memory, triiodo-L-thyronine, ethylcholine aziridium, glutamate, GABA; mice 238
mepindolol, bopindolol, beta-adrenoceptors, isoprenaline, pindolol; atria, rats, 657
metabolism, thermoregulation, dopamine system; substantia nigra, rats, 504
metabolism, UDP-glucuronosyl-transferase, sulfotransferase, digitoxin; human liver 226
microcirculation, celiprolol, beta 2-adrenoceptors, vasodilation; mesenterium coli, guinea pig 27
monoamine oxidase, catechol-O-methyltransferase, catecholamines; perfused rat lung 20
muscarinic receptor agonists, species specific sensitivity; human iris sphincter, 614
muscarinic receptor subtypes, acetylcholine release, cholinesterase; chicken heart 375
muscarinic receptor subtypes, cervane alkaloids, imperialine; guinea pig, dog 144
muscarinic receptor subtypes; human iris sphincter 620
muscarinic receptors, acetylcholine release, cholinergic neurons; hypothalamus, rats 1
muscarinic receptors, calcium antagonists, soman; bronchial smooth muscle, rats 352
muscarinic receptors, calcium release, phosphatidylinositol turnover; human neuroblastoma cells 255
muscarinic receptors, noradrenaline release; carotid artery, guinea pig 391
muscarinic receptors, pirmenol, stereoselectivity; papillary muscles, guinea pig, 555
muscarinic receptors, selectivity of agonists; smooth mucles, atria, guinea pig 383

N

Na channel blocking, antiarrhythmic drugs, asocainol, enantioselectivity; guinea pig atria 345
Na:K ratio, blood pressure, calcium intake; hypertensive rats, 542
naloxone, opioid receptors, substance P, spantide, neurokinin receptor antagonists; intrathecal injection, mice 69
neuroeffector junction, histamine 3 receptors; nictitating membrane, cat 208
neurokinin receptor antagonists, naloxone, opioid receptors, substance P, spantide; intrathecal injection, mice 69
neuronal noradrenaline uptake, age-related changes; vas deferens, rats 405
neuropeptide Y, noradrenaline release; brain, rats 472
neuropeptide Y, potassium, sodium, noradrenaline release, energy requirements; perfused heart, guinea pig 410
neurotransmission, adenosine analogues, acetylcholine release, purinoceptors; hemidiaphragma, mice 197
NMDA receptors, dizocilpine, 5-HT receptors; rats 138
nociception, bradykinin, capsaicin, blood pressure, pain; rats 219
noradrenaline, alpha-adrenoceptors, cotransmission, ATP; tail artery, rats 173
noradrenaline, uptake 1; rabbit dental pulp 166
noradrenaline metabolism, deamination; human uterine artery 286
noradrenaline release, clenbuterol, cAMP, forskolin; atria, rats 311
noradrenaline release, energy requirements, neuropeptide Y, potassium, sodium; perfused heart, guinea pig 410
noradrenaline release, G-protein, haloperidol, sigma-receptors; hippocampus, rats 32
noradrenaline release, histamine H_3 receptors; human saphenous vein 46
noradrenaline release, muscarinic receptors; carotid artery, guinea pig 391
noradrenaline release, neuropeptide Y; brain, rats 472
noradrenaline release, protease inhibitors, tetanus toxin; bovine adrenomedullary cells 358
noradrenaline release, purine nucleotides, purinoceptors; brain cortex, rabbit 187
noradrenaline transport system, desipramine, membrane solubilisation; bovine adrenal medulla 203
novelty-oriented behaviour, cholecystokinin receptors; brain, rats 425

O

3-O-methylglucose, aconitase, alloxan, glucose; liver mitochondria, rats, 532
ondansetron, tropisetron, 5-HT receptors; vagus nerve, rats, 496
opioid receptors, substance P, spantide, neurokinin receptor antagonists, naloxone; intrathecal injection, mice 69
oxygen free radicals, calcium antagonism, felodipine, xanthine; ischemia, rats 457

P

PACAP receptors, vasoactive intestinal polypeptide, apamin, potassium channels; taenia caeci, guinea pig, 511
pain, nociception, bradykinin, capsaicin, blood pressure; rats 219
Parkinsonism, entcapone, COMT inhibitors, L-DOPA; rats, 262
Parkinsonism, L-DOPA, biotransformation; substantia nigra, rats 277
pentylenetetrazol, anticonvulsant activity, age dependency; epileptic seizures, rats, 588
petussis toxin, catecholamine accumulation; bovine adrenal medulla, 649
pH, bicarbonate-dependent transporter; cardiomyocytes, rats, 597
phorbol ester, aluminum fluoride, phospholipase D, protein kinase C; atria, rats, 607
phorbol-12,13-diacetate, temperature, spasmogens; trachea, guinea pig, 573
phosphatidylinositol turnover, muscarinic receptors, calcium release; human neuroblastoma cells 255
phosphodiesterase III inhibition, heart failure, cardiotonic effect, R 79595; heart-lung preparation, guinea pig, 563
phospholipase D, protein kinase C, phorbol ester, aluminum fluoride; atria, rats, 607
photochemical reaction, thrombosis, arrhythmia, acetylsalicylic acid; coronary artery, rats, 550
physostigmine, dopamine neurons, limbic system; brain, rats 395
pindolol, mepindolol, bopindolol, beta-adrenoceptors, isoprenaline; atria, rats, 657
pirmenol, stereoselectivity, muscarinic receptors; papillary muscles, guinea pig, 555
PK 11 195, GABA receptors, benzodiazepine receptors, Ro 5-4864; chronic treatment, rats 432
plasminogen activator, thrombolytic potency, BM 06.021; rabbit, dog 108
platelet aggregation, adenosine receptors, adenosine analogues, CGS 21680; human and rabbit platelets, 673
PN 200-110, insuline release, calcium channels; rat insulinoma cells, 527
postnatal development, aging, chloride channels; skeletal muscles, 601
potassium, sodium, noradrenaline release, energy requirements, neuropeptide Y; perfused heart, guinea pig 410
potassium channel openers, vasorelaxation, cGMP, KRN 2391; isolated rabbit aorta 94
potassium channels, bradykinin receptors, bradykinin antagonists, relaxation; duodenal smooth muscle, rats 102

potassium channels, PACAP receptors, vasoactive intestinal polypeptide, apamin; taenia caeci, guinea pig, 511
prazosin, endothelium; aorta, rats 294
prolactin, dopamine D2 receptors; rats 152
prolactin, steroids, GABA receptor complex; pituitary cell cultures, 523
prostaglandin metabolism, angiotensin-converting enzyme inhibitors; healty volunteers 453
protease inhibitors, tetanus toxin, noradrenaline release; bovine adrenomedullary cells 358
protein kinase C, phorbol ester, aluminum fluoride, phospholipase D; atria, rats, 607
protein kinase C, veratridine, diacylglycerol, calcium; bovine adrenal medullary cells 76
purine nucleotides, purinoceptors, noradrenaline release; brain cortex, rabbit 187
purinoceptors, neurotransmission, adenosine analogues, acetylcholine release; hemidiaphragma, mice 197
purinoceptors, noradrenaline release, purine nucleotides; brain cortex, rabbit 187

R

R 79595, phosphodiesterase III inhibition, heart failure, cardiotonic effect; heart-lung preparation, guinea pig, 563
ralitoline, anticonvulsants, sodium current; seizure models, rodents 442
receptor-receptor interaction, formyl-peptide receptor, complement 5a receptor, G-protein; human leukemia 60 cells, 475
regional differences, dopamine release; caudat putamen, rats 267
relaxation, potassium channels, bradykinin receptors, bradykinin antagonists; duodenal smooth muscle, rats 102
reperfusion, leukocyte-endothelium interaction, adenosine receptors, ischemia; skinfold chamber, syrian golden hamster 234
Ro 5-4864, PK 11 195, GABA receptors, benzodiazepine receptors; chronic treatment, rats 432

S

salidiuretic action, cicletanine, ion transport, antihypertensive compounds; human red blood cells 114
selectivity of agonists, muscarinic receptors; smooth mucles, atria, guinea pig 383
sequence directed antibodies, immunoprecipitation, guanylyl cyclase; bovine, human platelets, 537
serotonin 1A receptors, adenylyl cyclase; monoclonal cell lines 367
serotonin receptors, transfection, G-protein; CHO-cells 127
serotoninergic drugs, dopamine release; substantia nigra, striatum, limbic forebrain, rats 12
sigma-receptors, noradrenaline release, G-protein, haloperidol; hippocampus, rats 32
sodium, noradrenaline release, energy requirements, neuropeptide Y, potassium; perfused heart, guinea pig 410
sodium current, ralitoline, anticonvulsants; seizure models, rodents 442
soman, muscarinic receptors, calcium antagonists; bronchial smooth muscle, rats 352
spantide, neurokinin receptor antagonists, naloxone, opioid receptors, substance P; intrathecal injection, mice 69
spasmogens, phorbol-12,13-diacetate, temperature; trachea, guinea pig, 573
species specific sensitivity, muscarinic receptor agonists; human iris sphincter, 614
sphincter Oddi, erythromycin, biliary motility; australian possum, 701
stereoselectivity, muscarinic receptors, pirmenol; papillary muscles, guinea pig, 555
steroids, GABA receptor complex, prolactin; pituitary cell cultures, 523
substance P, blood pressure, bronchoconstriction, CP-96,345, tachykinin antagonist; rabbit, guinea pig 323
substance P, spantide, neurokinin receptor antagonists, naloxone, opioid receptors; intrathecal injection, mice 69
substance P antagonist, CP-96,345, cardiovascular effects; blood pressure, heart rate, rats 328
substance P antagonist, tachykinins, CP-96,345; ileum, guinea pig, jejunum, rabbit 315
sulfotransferase, digitoxin, metabolism, UDP-glucuronosyl-transferase; human liver 226
sumatriptan, 5-HT like receptors; coronary arteries, dog, 592

T

tachykinin antagonist, substance P, blood pressure, bronchoconstriction, CP-96,345; rabbit, guinea pig 323
tachykinins, CP-96,345, substance P antagonist; ileum, guinea pig, jejunum, rabbit 315
taurin, homotaurin, GABA, dopamine metabolism; hypothalamus, striatum, rats 57
temperature, spasmogens, phorbol-12,13-diacetate; trachea, guinea pig, 573
tetanus toxin, noradrenaline release, protease inhibitors; bovine adrenomedullary cells 358
thermoregulation, dopamine system, metabolism; substantia nigra, rats, 504
thermoregulation, melatonin, UK-14304; caudal artery, rats 362
thrombolytic potency, BM 06.021, plasminogen activator; rabbit, dog 108
thrombosis, arrhythmia, acetylsalicylic acid, photochemical reaction; coronary artery, rats, 550
thromboxane A analogues, Ki4032, K channel openers; coronary arteries, dog, 691
transfection, G-protein, serotonin receptors; CHO-cells 127
triiodo-L-thyronine, ethylcholine aziridium, glutamate, GABA, memory; mice 238
tropisetron, 5-HT receptors, ondansetron; vagus nerve, rats, 496

U

UDP-glucuronosyl-transferase,sulfotransferase, digitoxin, metabolism; human liver 226
UK-14304, thermoregulation, melatonin; caudal artery, rats 362
uptake 1, noradrenaline; rabbit dental pulp 166
uptake 2, isoprenaline, hyperpolarization; trachealis muscle, guinea pig 399

V

vasoactive intestinal polypeptide, apamin, potassium channels, PACAP receptors; taenia caeci, guinea pig, 511
vasodilation, microcirculation, celiprolol, beta 2-adrenoceptors; mesenterium coli, guinea pig 27
vasorelaxation, cGMP, KRN 2391, potassium channel openers; isolated rabbit aorta 94
verapamil, gallopamil, calcium channel blocking, anipamil; heart, rabbit 339
veratridine, diacylglycerol, calcium, protein kinase C; bovine adrenal medullary cells 76

W

withdrawal, ethanol, excitatory amino acid receptors; ethanol-treatment, rats 437

X

xanthine, oxygen free radicals, calcium antagonism, felodipine; ischemia, rats 457
